How to Use this Book

This book provides all the information and resources you will need to implement the Lions Quest *Skills for Action* curriculum for high school. The first part of the book provides a general program overview and information on the research-based background of *Skills for Action*.

Beginning on page 32, the curriculum components are explained in detail, followed by detailed implementation recommendations and procedures.

The final portion of the book (pages 64-71) provides in-depth guidance on organizing and facilitating the Advisory Team, your way of connecting the classroom to school administration and community while implementing *Skills for Action*.

This book is supplemented by printable handouts, which are available to you as PDFs on the LQ (Lions Quest) Digital Resources Drive that you were provided with other program materials.
